

Folder and Backup Checklist

Build a CS110 workspace another learner can understand and you can recover after a mistake.

14/14

ITEMS CHECKED

Start with a structure you can explain.

01 // COURSE WORKSPACE

```
CS110/  
  00_Start_Here/  
  01_Week_01_Training_Day/  
    evidence/  
    references/  
    working/  
  02_Week_02/  
    evidence/  
    references/  
    working/  
  90_Shared/  
  99_Recovery/
```

Confirm each part of the system.

02 // ROUTE CHECK

01

I can find Modules, Assignments, Grades, and Announcements in Canvas.

02

I reopened the CS110 Nexus from the Canvas course.

- | | | | |
|--|---|--|---|
|  03 | I downloaded the CS110 syllabus PDF and saved it in 00_Start_Here. |  04 | I subscribed to the Malik Stalbert YouTube channel. |
|  05 | I subscribed to Learners Cloud on Substack. |  06 | I reviewed the Discord tutorial and joined the P2P Discord community. |
|  07 | I created the Week 1 and Week 2 folders. |  08 | I created a shared folder link that opens without an access request. |
|  09 | I posted the shared folder link in the designated course channel under the-beginning. |  10 | I saved a screenshot of the Discord discussion. |
|  11 | I made one recovery copy. |  12 | I reopened the last usable version from the recovery copy. |
|  13 | I tested one download and one upload. |  14 | I recorded any access problem instead of hiding it. |

Make the evidence easy to find.
